# Chief's Report

15 February, 2106

1. The District responded to 31 calls for service in the month of January, 2016. This is 28 fewer runs than in January of 2015. During the month of January District members participated in 151 training events for a total of 639.67 staff hours in training.
2. FF Kiser has accepted a position with the Columbia Fire Department. His last day here will be 21 March.
3. We are investigating alternative ways to ensure an adequate number of candidates are interviewed for the upcoming Recruit Academy. These options will not jeopardize our standing with the Tri State Alliance.
4. To protect the financial interest of the District we will be modifying some issue with our Recruit Academy to include cost recovery should a probationary firefighter leave before they complete their first year.
5. I have had some interest expressed in our Metz Aerial. It is too early to tell if anything might come of this, but I will keep the Board informed.
6. The correct generator has been installed at Station 3 and we are waiting for the gas line to be connected.
7. The fuel cell at Station 3 is now fully operational. We are waiting for parts to complete the alerting system part of the Station 3 project.
8. We have bids for the painting of Fire Station 3 which are within the projected budget for that project. With the Board's approval I will schedule this project as soon as the weather permits.
9. I have an estimate from Clary Concrete to continue driveway repairs at the Headquarters Campus. The blacktop continues to degrade and is in need of replacement. We have the funding to extend concrete all the way to Porter Mill Spring Road on one half of the driveway. This is within the budget proposed for the project. The remainder of the repair can be addressed in budget year 2017 or at the end of this budget year if funds are present.
10. Chief Criner has formed an Operations Committee to serve in an advisory role to the Command Staff. We believe this step will enhance our inter -department communications and allow for a better flow of information from our field forces.
11. We have begun using the Target Solutions on-line training resources to handle our annual compliance and in-service EMS Training. The system will allow a more effective way to manage our time, delivery the needed training, and track our participation and renewal requirements for our members.
12. I have met with the Bolivar Fire Chief and we are exploring some opportunities for us to partner with them in the future.

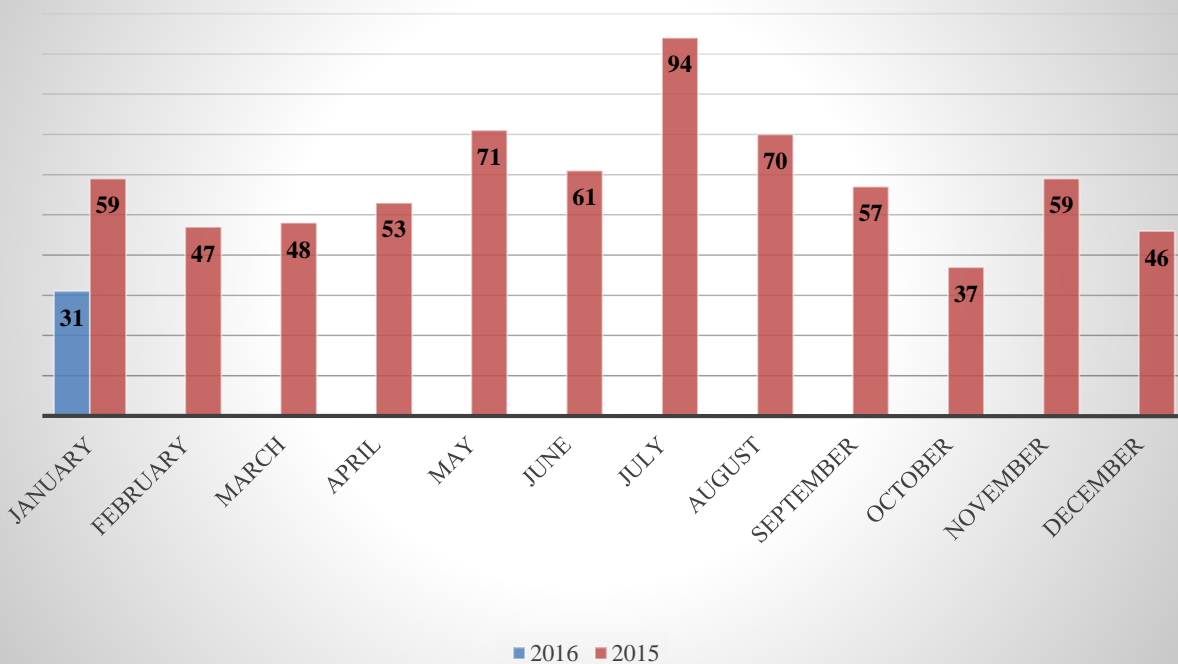

## Fleet Status

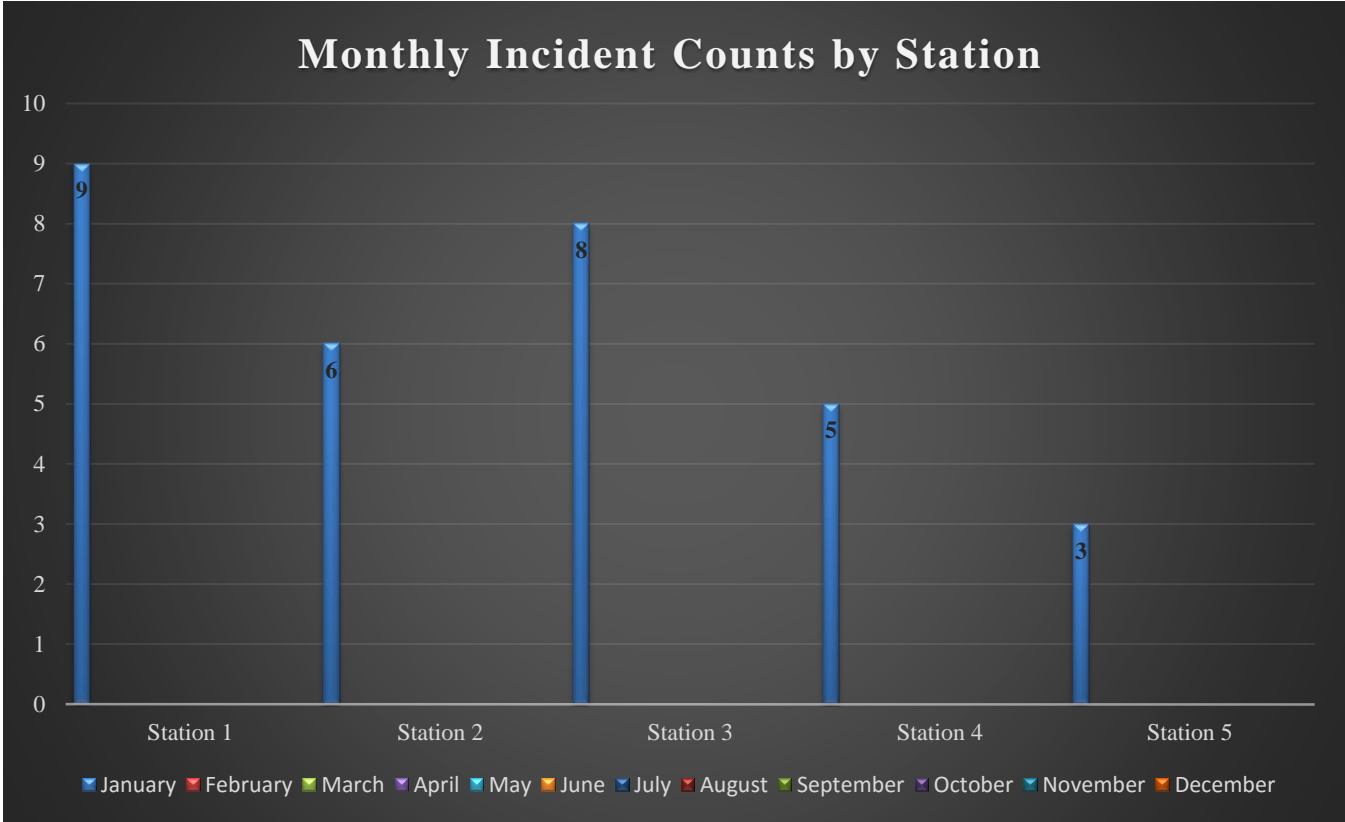

- The annual services & DOT inspections have begun; I expect that several front steering tires will need to be replaced. Some of these are long standing issues that we now have the funding to address.
- Engine – 32 fuel system issue has been corrected
- Squad – 12 had a primer pump issue that has been corrected
- CFM Northcott's car had a transmission issue that has been corrected.

## Run Distribution by Type of Incident Janaury, 2016

## Responses per Month

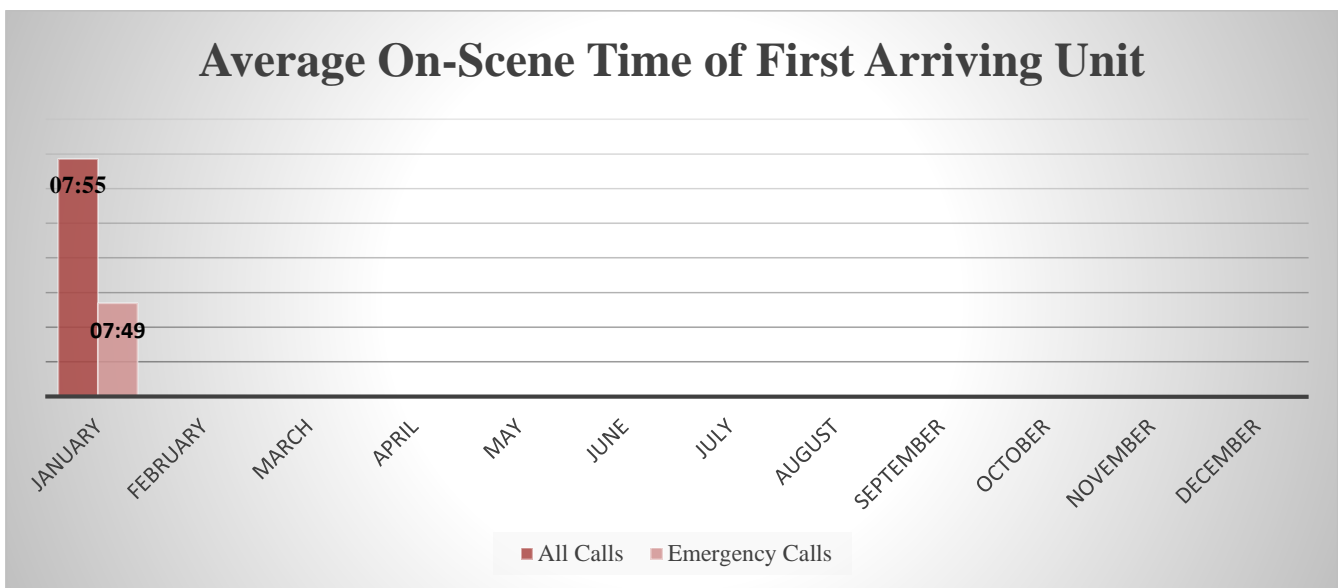

## Overlapping Incidents - 2016

## Average On-Scene Time of First Arriving Unit

With Staffing @ Station 3	5:59 average on- scene time	13 Days	2 Incidents
Without Staffing @ Station 3	6:59 average on -scene time	18 Days	7 Incidents
